

TOP 10

VR/AR trends to look out for in 2022

VR/AR trends to look out for in 2022

By 2022, unique AR/VR trends and predictions will enhance the technology-driven industry. Here are the top ten:

01. Incorporation of AI into the AR/VR environment

- Advanced machine learning and other AI approaches can better assist computers and other gadgets.

02. AR in shopping and retail

- To develop virtual shopping experiences like virtual fitting, sampling.

03. Interior navigation to show users how to go to any product, software, or place

- Interior navigation to show users how to go to any product, software, or place.

04. AR in Healthcare

- AR is now being used to prepare for surgery in the form of checklists and walkthroughs of organs.

05. Developments in AR/VR displays

- To ensure that the massive amount of high-power material shows on screen.

06. 5G-enabled AR/VR developments

- 5G will accelerate data transfer to the cloud, processing, and the construction of a virtual picture, hence a better virtual experience.

07. AR/VR in education

- To assist teachers in engaging students with studying content in a variety of fresh and fascinating ways.

08. Using the potential of AR/VR to outfit vehicles

- Autonomous vehicles with voice assistants, in-car AR, and more to alter the way people move and travel in the future.

09. Remote assistance via AR/VR

- Technicians will be able to observe, examine on-site issues in real-time.

10. Advent of WebAR

- This will make it easier for people to engage with augmented reality on the web.

TECHVIFY

Empower your digital innovation

Vietnam-based software development firm leading in cutting-edge solutions.
